mySAFE™ - Lockbox with advanced new motion alarm

Can you afford to lose your cell phone, car keys, iPod, Blackberry, PDA, camera, GPS, Bluetooth headset, sunglasses, watch, jewellery, wallet, purse or credit cards to opportunistic thieves? Not only can these be expensive, they may also carry important personal information that's difficult to replace and could compromise your security.

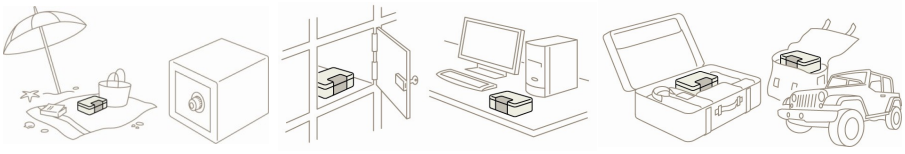
Revolutionary new lockbox with motion alarm:

mySAFE is a revolutionary new lockbox designed to protect your valuables. Its unique design combines a strong combination lock with a sophisticated motion alarm to keep your personal items exactly where you left them. Don't be fooled by the simple exterior - mySAFE includes Motion Monitoring Technology™ that intelligently scans for interference. If someone tampers with mySAFE while it's armed, a loud 102dB alarm goes off! No need to worry about accidental bumps - mySAFE knows what's a threat and what's not.

Added protection for everyday locations:

mySAFE was developed after extensive research into areas of high theft. We set out to create a unique lockbox designed to excel in busy environments without creating unnecessary false alarms. Unlike other security products, mySAFE's revolutionary technology accurately measures both movement and distance. This world first not only allows users to choose what security mode they want, it also lets mySAFE determine real threats from accidental knocks. When a real threat occurs, the loud alarm draws attention quickly, disturbing thieves who may have otherwise walked away unnoticed.

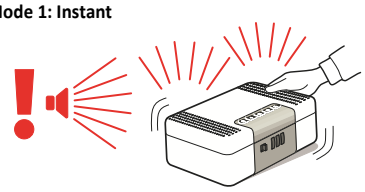
Keep your valuables safe:



At the beach or pool; in a hotel room; in a gym or school locker; in a college dorm; at your workstation; on vacation; at summer camp; at sports training; in any bag or suitcase; in your RV or car.

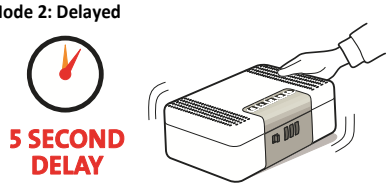
Choose a security mode that's right for you:

Mode 1: Instant



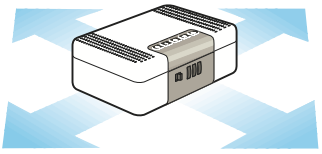
Detects the slightest movement and sets off a loud alarm for maximum security in high risk areas. Works on any angle with full 360 degree monitoring.

Mode 2: Delayed



Instant mode with a 5 second delay before alarm sounds. Lets you conveniently disarm your mySAFE without it going off. Perfect for inside a bag, parked car, or dorm room.

Mode 3: Timed



Alarm sounds only if movement is detected for more than 3 seconds. Prevents false alarms in busy places without compromising security. Perfect for inside a desk drawer, locker or workstation.

Box Contents:

- mySAFE portable safe
- User Manual
- 3 x AAA Batteries

Pricing:
MSRP: US$99.95

Part Number:
MS1-R1

UPC Code:
